## WHY ARREST CONTAINER WITH 22 TONS OF UZBEK YARN IN THE U.S.?

12uz.com - Unfair competition. Exactly the way it is explained in recent years inflame hysteria around the Uzbek cotton. It has long it is no secret that a number of American corporations pay cotton human rights organizations holding shares to discredit the cotton produced in Uzbekistan. And this is due not humane impulses, as trying to present to the general public.

jealousy in this particular exhibit notorious «Cotton Campaign», has long been known as a structure openly lobbying the interests of large corporations American cotton, and has been organizing various kinds of information campaigns against competitors their owners.

fact that as well as in Uzbekistan, cotton is a major crop grown in the United States. But it turned out that in recent years due to its quality and price weighted Uzbek cotton is grown in the market pushed the Americans. By the way, it is easy to see by looking at the rapidly growing demand for cotton from Uzbekistan.

eventually got to the point that consumers previously purchased cotton in the U.S. pulled in Uzbekistan. It is understandable - normal businesswoman throwing money down the drain will not be - it's business ... What, respectively, turned out for American losses. And instead to adapt to market conditions the U.S. decided to go through political intrigue.

way recently, the U.S. has once again proved it. Recently Uzbek-Singaporean joint venture to produce yarn «Indorama Kokand Textile» IBEC appealed to Uzbekistan to explain the reason for the detention of the container with its 22 tons of yarn in the port g.Los Angeles USA.

As it turned out, in September of this year, said container was sent to the client's address «EDPA USA Inc.». However, 14 October shipment was detained by U.S. Customs at the port of Los Angeles. What is particularly interesting, U.S. customs officials refused to give explanations on the fact unjustified detention of 22 tons of yarn.

Further events started to become more interesting character. After the detention of cargo employees Department of Homeland Security United States began to put pressure on the company «EDPA USA Inc.» To force them to abandon the import of cotton yarn from Uzbekistan, but instead buy American cotton.

obvious that such drastic measures are explained by the recent conclusion of the International Organization UN work on the monitoring results of the process the cotton harvest in Uzbekistan, which effectively denied dissolve

«Cotton Campaign» all sorts of gossip around the Uzbek cotton. I recall that the ILO spokesman Hans Von Voland said the following: "... the results of monitoring the systematic use of child labor was not." Note that during his stay in Uzbekistan ILO experts made 806 visits to farms, educational institutions and places of the cotton harvest in 1592 and spent the interview.

And judging by what is happening, the ILO did not meet expectations American cotton magnates, as well, to no avail and trips themselves employees of the U.S. diplomatic mission in Tashkent in Uzbekistan regions in order to find "the exploited children in the cotton fields."

So we decided to USA, spit on the rules of law, open to move from words to deeds ... Author: Sarwar Rashidov
